Generated at UTC: 2026-07-24T01:09:51.973495+00:00

Report range: Last 30 Days

Project: DAC Enode Intelligence Watcher

This custom report is generated from local watcher JSON outputs.

Important note: this report is observation-based. It does not make official DAC ownership claims and should not be treated as a definitive decentralization measurement.

5. Provider / ASN Concentration Context

Field	Value
Overall concentration label	MODERATE
Headline	Observed infrastructure shows moderate concentration under the current heuristic model.
Key observation	Top live ASN is AS51167 with 15 unique IPs (35.71%).

Field	Value
Country observation	Top live ASN country code is DE with 18 unique IPs (42.86%).
Interpretation	Top live ASN controls at least 35% of observed unique IPs.
Disclaimer	Provider concentration and decentralization risk summary is an observation-based heuristic. It is based on currently available watcher data, live ASN enrichment, static provider hints, and DAC Infrastructure Signal labels. It should not be treated as an official DAC classification or as a definitive decentralization measurement.

7. Report-Use Notes

- Use the 7D report for short-range rotation and recent watcher movement.
- Use the 30D report for broader trend context once the 15-minute watcher has accumulated enough observations.
- Use the All Time report for full testnet observation history preserved by this watcher.
- For publication-quality interpretation, compare this Markdown output with dashboard charts, raw JSON outputs, and selected snapshots.
