Generated at UTC: 2026-06-09T11:39:25.246774+00:00

Report range: Last 30 Days

Project: DAC Enode Intelligence Watcher

This custom report is generated from local watcher JSON outputs.

Important note: this report is observation-based. It does not make official DAC ownership claims and should not be treated as a definitive decentralization measurement.

4. Anomaly Summary

Field	Value
Selected anomaly signals	5
Global anomaly summary	5 anomaly signals were detected across 47 observations. The highest observed anomaly severity is HIGH.
Global highest severity	HIGH
Recommended action	Use these anomaly events as candidates for deeper manual review and future technical reporting.

Severity	Signals in selected range

5. Provider / ASN Concentration Context

Field	Value
Overall concentration label	ELEVATED
Headline	Observed infrastructure shows elevated concentration under the current heuristic model.
Key observation	Top live ASN is AS51167 with 15 unique IPs (46.88%).
Country observation	Top live ASN country code is DE with 18 unique IPs (56.25%).
Interpretation	Top live ASN controls at least 35% of observed unique IPs. Observed IPs show notable concentration in one live ASN country code.
Disclaimer	Provider concentration and decentralization risk summary is an observation-based heuristic. It is based on currently available watcher data, live ASN enrichment, static provider hints, and DAC Infrastructure Signal labels. It should not be treated as an official DAC classification or as a definitive decentralization measurement.

Dimension	Top Name	Top Count	Top %	Label
Live ASN	AS51167	15	46.88	MODERATE
Live Country	DE	18	56.25	ELEVATED
DAC Infrastructure Signal	Retained Infrastructure Signal	9	28.12	LOW

7. Report-Use Notes

- Use the 7D report for short-range rotation and recent watcher movement.
- Use the 30D report for broader trend context once the 15-minute watcher has accumulated enough observations.
- Use the All Time report for full testnet observation history preserved by this watcher.
- For publication-quality interpretation, compare this Markdown output with dashboard charts, raw JSON outputs, and selected snapshots.
