Range: 7d

Report layer version: v1.8.0

Generated at UTC: 2026-06-14T19:12:19.160005+00:00

This portrait PDF is generated from the structured custom range JSON summary.

## 1. Range Summary

| Field                 | Value                                        |
|-----------------------|----------------------------------------------|
| Project               | DAC Infrastructure Intelligence Watcher      |
| Snapshot count        | 22                                           |
| First snapshot        | 2026-06-08T01:59:16-847351+00-00-health.json |
| Latest snapshot       | 2026-06-14T17:46:11-842614+00-00-health.json |
| First checked at UTC  | 2026-06-08T01:59:16.847351+00:00             |
| Latest checked at UTC | 2026-06-14T17:46:11.842614+00:00             |
| Overall status counts | DEGRADED: 9, HEALTHY: 11, PARTIAL_OUTAGE: 2  |

## 2. Endpoint Status Counts

| Endpoint             | Status counts                          |
|----------------------|----------------------------------------|
| official_public_rpc  | DEGRADED: 9, HEALTHY: 11, UNHEALTHY: 2 |
| explorer_web         | HEALTHY: 22                            |
| primary_explorer_api | HEALTHY: 22                            |

## 3. Response-Time Summary

| Endpoint             | Average    | Max        | Response class counts          |
|----------------------|------------|------------|--------------------------------|
| official_public_rpc  | 2482.86 ms | 15336.0 ms | FAST: 2, MODERATE: 1, SLOW: 19 |
| explorer_web         | 627.45 ms  | 1246.0 ms  | FAST: 7, MODERATE: 15          |
| primary_explorer_api | 453.09 ms  | 1157.0 ms  | FAST: 15, MODERATE: 7          |

## 6. Interpretation Guide

- Availability status describes whether a service is reachable and usable.
- Response class describes response-time behavior, not availability.
- Older snapshots may show UNKNOWN or null response class because response-time classification was added after the initial watcher release.
- This custom range report is independent observation material and not an official DAC service status page.

## Status & Response-Class Glossary

| Status / Class | Meaning                                                                                                           |
|----------------|-------------------------------------------------------------------------------------------------------------------|
| HEALTHY        | The endpoint or overall infrastructure state is reachable and behaving as expected.                               |
| DEGRADED       | The endpoint is reachable, but one or more checks or response-time indicators show reduced quality.               |
| PARTIAL_OUTAGE | At least one monitored endpoint is unavailable or failing while other endpoints remain reachable.                 |
| UNHEALTHY      | The endpoint failed required checks or did not provide usable responses.                                          |
| FAST           | The observed response-time class is fast for this watcher context.                                                |
| MODERATE       | The observed response-time class is acceptable but not fast.                                                      |
| SLOW           | The observed response-time class is slow and may indicate degraded user experience.                               |
| UNKNOWN        | The watcher could not classify the response-time state, often because older snapshots did not include this field. |
| N/A            | Not available or not applicable for the selected observation, endpoint, or historical snapshot.                   |
