

DAC Enode Intelligence Watcher - Custom Last 7 Days Report

Generated at UTC: 2026-06-17T14:04:53.138207+00:00

Report range: Last 7 Days

Project: DAC Enode Intelligence Watcher

This custom report is generated from local watcher JSON outputs.

Important note: this report is observation-based. It does not make official DAC ownership claims and should not be treated as a definitive decentralization measurement.

1. Report Scope

Field	Value
Range	Last 7 Days
Observation count	28
First observed source time	Jun 10, 2026 (18:00 CEST)
Last observed source time	Jun 17, 2026 (16:00 CEST)
Latest watcher checked_at_utc	2026-06-17T14:04:47.933213+00:00
Latest source generated time	Wed Jun 17 04:00:02 PM CEST 2026

2. Enode Movement Summary

Metric	Value
Minimum enode count	2
Maximum enode count	16
Average enode count	12.75
Total added observations	21
Total removed observations	28

Metric	Value
Target ports observed	28657

3. Observation Source Coverage

Phase	Observations
automated_watcher	28

4. Anomaly Summary

Field	Value
Selected anomaly signals	7
Global anomaly summary	12 anomaly signals were detected across 81 observations. The highest observed anomaly severity is CRITICAL.
Global highest severity	CRITICAL
Recommended action	Use these anomaly events as candidates for deeper manual review and future technical reporting.

Severity	Signals in selected range
HIGH	3
CRITICAL	2
MEDIUM	2

Anomaly Type	Signals in selected range
HIGH_REMOVAL_EVENT	2
SHARP_ENODE_COUNT_DROP	1
AGGRESSIVE_ROTATION	1
LOW_CONTINUITY_RATIO	1
WATCHER_HIGH_SEVERITY_SIGNAL	1
MODERATE_ROTATION_SPIKE	1

5. Provider / ASN Concentration Context

Field	Value
Overall concentration label	MODERATE
Headline	Observed infrastructure shows moderate concentration under the current heuristic model.
Key observation	Top live ASN is AS51167 with 15 unique IPs (39.47%).
Country observation	Top live ASN country code is DE with 18 unique IPs (47.37%).
Interpretation	Top live ASN controls at least 35% of observed unique IPs.
Disclaimer	Provider concentration and decentralization risk summary is an observation-based heuristic. It is based on currently available watcher data, live ASN enrichment, static provider hints, and DAC Infrastructure Signal labels. It should not be treated as an official DAC classification or as a definitive decentralization measurement.

Dimension	Top Name	Top Count	Top %	Label
Live ASN	AS51167	15	39.47	MODERATE
Live Country	DE	18	47.37	MODERATE
DAC Infrastructure Signal	Retained Infrastructure Signal	11	28.95	LOW

6. Observation Timeline

#	Phase	Status	Source Time	Current	Added	Removed	Unchanged	Port
54	automated_watcher	changed	Jun 10, 2026 (18:00 CEST)	14	1	0	13	28657
55	automated_watcher	changed	Jun 11, 2026 (00:00 CEST)	15	1	0	14	28657
56	automated_watcher	changed	Jun 11, 2026 (02:00 CEST)	14	0	1	14	28657
57	automated_watcher	changed	Jun 11, 2026 (08:00 CEST)	14	1	1	13	28657
58	automated_watcher	changed	Jun 11, 2026 (12:00 CEST)	13	0	1	13	28657
59	automated_watcher	changed	Jun 11, 2026 (20:00 CEST)	14	1	0	13	28657

#	Phase	Status	Source Time	Current	Added	Removed	Unchanged	Port
60	automated_watcher	changed	Jun 11, 2026 (22:00 CEST)	15	1	0	14	28657
61	automated_watcher	changed	Jun 12, 2026 (16:00 CEST)	14	0	1	14	28657
62	automated_watcher	changed	Jun 12, 2026 (20:00 CEST)	15	1	0	14	28657
63	automated_watcher	changed	Jun 12, 2026 (22:00 CEST)	16	1	0	15	28657
64	automated_watcher	changed	Jun 13, 2026 (00:00 CEST)	15	0	1	15	28657
65	automated_watcher	changed	Jun 13, 2026 (04:00 CEST)	16	1	0	15	28657
66	automated_watcher	changed	Jun 13, 2026 (08:00 CEST)	15	0	1	15	28657
67	automated_watcher	changed	Jun 13, 2026 (22:00 CEST)	14	0	1	14	28657
68	automated_watcher	changed	Jun 14, 2026 (02:00 CEST)	15	1	0	14	28657
69	automated_watcher	changed	Jun 14, 2026 (12:00 CEST)	14	0	1	14	28657
70	automated_watcher	changed	Jun 14, 2026 (14:00 CEST)	16	2	0	14	28657
71	automated_watcher	changed	Jun 14, 2026 (18:00 CEST)	14	0	2	14	28657
72	automated_watcher	changed	Jun 14, 2026 (20:00 CEST)	14	1	1	13	28657
73	automated_watcher	changed	Jun 15, 2026 (08:00 CEST)	13	0	1	13	28657
74	automated_watcher	changed	Jun 15, 2026 (20:00 CEST)	11	0	2	11	28657
75	automated_watcher	changed	Jun 16, 2026 (04:00 CEST)	10	0	1	10	28657
76	automated_watcher	changed	Jun 16, 2026 (14:00 CEST)	11	2	1	9	28657
77	automated_watcher	changed	Jun 16, 2026 (18:00 CEST)	8	0	3	8	28657
78	automated_watcher	changed	Jun 16, 2026 (22:00 CEST)	9	1	0	8	28657

#	Phase	Status	Source Time	Current	Added	Removed	Unchanged	Port
79	automated_watcher	changed	Jun 17, 2026 (06:00 CEST)	10	1	0	9	28657
80	automated_watcher	changed	Jun 17, 2026 (12:00 CEST)	2	0	8	2	28657
81	automated_watcher	changed	Jun 17, 2026 (16:00 CEST)	6	5	1	1	28657

7. Report-Use Notes

- Use the 7D report for short-range rotation and recent watcher movement.
- Use the 30D report for broader trend context once the 15-minute watcher has accumulated enough observations.
- Use the All Time report for full testnet observation history preserved by this watcher.
- For publication-quality interpretation, compare this Markdown output with dashboard charts, raw JSON outputs, and selected snapshots.
