

# DAC Infrastructure Intelligence Watcher - Observation Window Comparison

Comparison scope: 7d

Comparison layer version: v1.8.1

Generated at UTC: 2026-07-10T21:52:48.186784+00:00

This portrait PDF compares Window A and Window B infrastructure observation segments.

## 1. Window Summary

| Field                   | Window A                         |
|-------------------------|----------------------------------|
| Snapshot count          | 1                                |
| Observation index range | 83 -> 83                         |
| First checked at UTC    | 2026-07-06T16:44:58.068005+00:00 |
| Latest checked at UTC   | 2026-07-06T16:44:58.068005+00:00 |
| Overall status counts   | DEGRADED: 1                      |
| Availability score      | 0.55                             |

| Field                   | Window B                         |
|-------------------------|----------------------------------|
| Snapshot count          | 1                                |
| Observation index range | 84 -> 84                         |
| First checked at UTC    | 2026-07-06T18:32:00.687312+00:00 |
| Latest checked at UTC   | 2026-07-06T18:32:00.687312+00:00 |
| Overall status counts   | HEALTHY: 1                       |
| Availability score      | 1.0                              |

## 2. Endpoint Availability and Response Comparison

| Endpoint             | Window A status | Window B status | A avg      | B avg     |
|----------------------|-----------------|-----------------|------------|-----------|
| official_public_rpc  | DEGRADED: 1     | HEALTHY: 1      | 15569.0 ms | 7120.0 ms |
| explorer_web         | HEALTHY: 1      | HEALTHY: 1      | 684.0 ms   | 468.0 ms  |
| primary_explorer_api | HEALTHY: 1      | HEALTHY: 1      | 596.0 ms   | 406.0 ms  |

## 3. Response Class Comparison

| Endpoint             | Window A classes | Window B classes | A max      | B max      |
|----------------------|------------------|------------------|------------|------------|
| official_public_rpc  | SLOW: 1          | SLOW: 1          | 17038.0 ms | 13713.0 ms |
| explorer_web         | MODERATE: 1      | FAST: 1          | 684.0 ms   | 468.0 ms   |
| primary_explorer_api | MODERATE: 1      | FAST: 1          | 604.0 ms   | 419.0 ms   |

## 4. Interpretation

- Overall availability score changed from 0.55 to 1.0: IMPROVED.
- Official Public RPC average response changed from 15569.0 ms to 7120.0 ms: IMPROVED.
- Explorer Web average response changed from 684.0 ms to 468.0 ms: IMPROVED.
- Primary Explorer API average response changed from 596.0 ms to 406.0 ms: IMPROVED.
- The later observation window shows stronger overall infrastructure availability.

## 5. Window A Timeline

| #  | Checked at UTC                   | Overall  | RPC      | RPC class | Web     | API     |
|----|----------------------------------|----------|----------|-----------|---------|---------|
| 83 | 2026-07-06T16:44:58.068005+00:00 | DEGRADED | DEGRADED | SLOW      | HEALTHY | HEALTHY |

## 6. Window B Timeline

| #  | Checked at UTC                   | Overall | RPC     | RPC class | Web     | API     |
|----|----------------------------------|---------|---------|-----------|---------|---------|
| 84 | 2026-07-06T18:32:00.687312+00:00 | HEALTHY | HEALTHY | SLOW      | HEALTHY | HEALTHY |

## 7. Interpretation Guide

- Window A represents the earlier observation segment.
- Window B represents the later observation segment.
- For availability score, higher is better.
- For response time, lower is better.
- Older snapshots may show N/A or UNKNOWN response classes because response-time classification was added after the initial watcher release.
- This comparison report is independent observation material and not an official DAC service status page.

## Status & Response-Class Glossary

| Status / Class | Meaning                                                                                                           |
|----------------|-------------------------------------------------------------------------------------------------------------------|
| HEALTHY        | The endpoint or overall infrastructure state is reachable and behaving as expected.                               |
| DEGRADED       | The endpoint is reachable, but one or more checks or response-time indicators show reduced quality.               |
| PARTIAL_OUTAGE | At least one monitored endpoint is unavailable or failing while other endpoints remain reachable.                 |
| UNHEALTHY      | The endpoint failed required checks or did not provide usable responses.                                          |
| FAST           | The observed response-time class is fast for this watcher context.                                                |
| MODERATE       | The observed response-time class is acceptable but not fast.                                                      |
| SLOW           | The observed response-time class is slow and may indicate degraded user experience.                               |
| UNKNOWN        | The watcher could not classify the response-time state, often because older snapshots did not include this field. |
| N/A            | Not available or not applicable for the selected observation, endpoint, or historical snapshot.                   |
